I apologize for the inconvenience you're experiencing with the application crashing during file uploads. This issue is often caused by file sizes exceeding the 50MB limit or unsupported file formats, such as those not in PDF, DOCX, XLSX, CSV, or PNG. To resolve this, please ensure your file meets these requirements and try clearing the application cache. If the problem persists, please provide more details about the file you're trying to upload, and I'll be happy to further assist you.
